

*“Greens continually challenge the lowest common denominator approach to politics by appealing to our better nature.”*

Shahrar Ali trained first as a biotechnologist then as a moral philosopher. He has forewarned about the dangers of GM Food in Europe.

Shahrar advocates greater reasoning in politics, combined with Green thinking about what gives meaning to our lives.

“Take education,” Dr Ali adds, “the government argues that the more you learn the more you earn. What about education for its own sake!”

British by birth and a Londoner, Shahrar moved to Brent five years ago. He has campaigned on many fronts - be it to defend our local heritage or to confront prejudice wherever it occurs.

## Green candidate for Brent East

Green philosophy puts environmental sustainability and social justice at the heart of our political agenda. We believe in a safe and just world for ourselves, our children and our grandchildren. Greens will work for:

### **A Better Environment**

Are you alarmed by this government's indifference to the horrendous future consequences of climate change? Only the Greens are committed to meaningful investment in renewable energy, waste reduction and recycling. We will make taxes

work to cut pollution and get polluters to pay. We will protect green space, waterways and wildlife. We will put an end to animal experiments, factory farming and bloodsports. We will ban GM crops and support organic production to make good food available for all.

### **Decent Public Services**

Don't we deserve a transport system that is publicly owned, accessible and reliable? Greens will invest in better public transport, footpaths, cycleways, and safe routes to school. We

oppose new roadbuilding and airport expansion.

We will defend our hospitals, post offices and police stations from privatisation or closure - and our schools and libraries, too! We call for greater police visibility to tackle crime and the fear of crime. We will abolish tuition fees and promote lifelong learning.

### **Justice for All**

Greens are committed to peace and human rights - everywhere. We opposed the unjust war in Iraq and defend civil liberties here.

We will work to scrap all Weapons of Mass Destruction, including our own, and halt the manufacture and export of arms.

Greens will protect those fleeing persecution and work for a just asylum system. We fight to end all forms of racism, sexism, homophobia, and discrimination on grounds of disability or religion. We will give pensioners a fair deal.

### **Greens Make A Difference**

Greens now serve on the London Assembly, in the European and Scottish Parliaments, and on many councils. Over a million people voted for us in the European elections last year. Our support is growing.

Vote for real progress. Vote Green - for what you believe in.
